### Product Summary

Blasting with Sodium Bi-carbonate (Soda) media removes paint, grease, oil, dirt, etc. off parts without any surface damage or change in finish. TRINCO Soda Blast cabinets are designed for blasting specifically with Sodium Bi-Carbonate Media. Specialized components and machine design are utilized for smooth consistent flow of soda media. System is designed to blast soda media for one time because soda media is not recyclable.

TRINCO™ MODEL DC850 DUST COLLECTOR:

- □ Traps the finer dust particles that pass thru the Media Separator
- □ Pull thru design with motor and fan on clean air side
- □ 30 Tubular cloth filters - 145 sq. feet of filter surface area

- Manual filter shaker
- 2 HP 230V/1 Phase motor installed

## Product Short Description
